

**1** Water sampling made simple  
Let us take the stress out of your sampling so you can concentrate on improving your water quality. From the moment a sample is collected by one of our City and Guilds accredited expert samplers, the goal of Tetras is to combine it with the lab water analysis in one easy to use system.

**2** On-site tracking  
Barcode tracking imports sample data. Existing outlet barcodes can be integrated to ensure you don't have an array of outlet indicators.

**3** Latest lab sample technology  
Tetras incorporates the latest lab sample management systems. And our team of water quality analysts are available to help ensure your compliance on site.

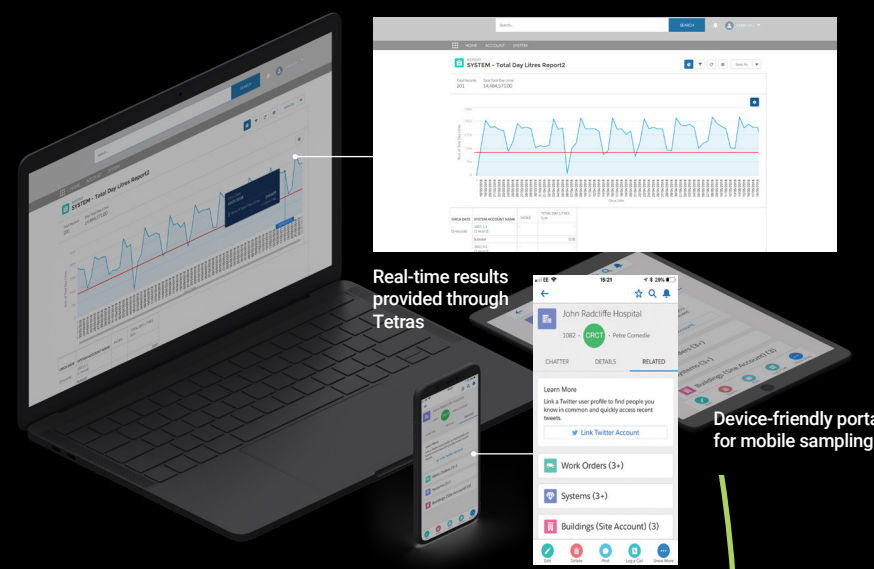

Our sampling prices are including and not limited to the below pathogens.

Pathogens	Price per sample
Legionella	£20*
Pseudomonas Aeruginosa	£20*
EColi	£20*
Coliforms	£20*
TVC's @ 22 & 37 degrees	£20*

\* Tetras is included within our water sampling prices

**4** Real-time results  
Utilising Salesforce, data is delivered to the Tetras platform so you can view real-time & easy to understand sample results.

Real-time results provided through Tetras

Device-friendly portal for mobile sampling
